The lack of a **G**₁ proves that
the 1776 Special and 1778 coins

they would have had a **G**^{+X} ~~since~~
they must have been made after
Comm + Vt coinage because they
only used the letters which were

There is a decent G in the nicer

Geo III Rev D v.g.

The first shows clicking of dies with draping of dress
in area of globe, pointed into area betw forehead and
III; also 88 shows above top leaf. Thus weakness ~~around~~
around III is caused by clicking.

Also not the dies were recut with the following changes
End of E in INDE is curved. Cut to square
leaves in branch small. Cut larger
inner foot ~~will above~~ baseball. ~~End~~ Recut so it almost touches.

Note top right couple of I is missing.
